

W•I•S•E Software Demonstration Package

W•I•S•E Software for the 840 Data Station was recently introduced to provide chromatographers with assistance in the selection of optimal eluents for isocratic liquid chromatography. The W•I•S•E Software Demonstration Package provides an easy way to introduce this product to 840 users having an interest in eluent optimization.

The demo package consists of a diskette plus a photocopy of the W•I•S•E Software product manual. The demo version of the software is identical to the W•I•S•E software product except for the following:

- * Test data files are built into the software. These cannot be permanently altered by the user.
- * Data files cannot be created or saved by the user.

The demo software allows all other features of W•I•S•E software to be tested and explored, and provides an ideal way to acquaint 840 users with this product.

Recently, all Waters sales offices were provided with a W•I•S•E software demonstration package, along with instructions for duplicating the diskette and documentation as needed. Please take advantage of this opportunity to introduce 840 users to W•I•S•E software.
