

This is the 3rd in a series of lab highlights (0400-0408) presenting the tables of contents of the World Wide Technical Meeting Proceedings.

**Proceedings of the Third
World Wide Technical Meeting
Table of Contents
1985**

<u>Paper #</u>	<u>Title</u>	<u>Author</u>
1	Prot. Isolation and Purif. Using the Delta Prep™ 3000	M. Swartz
2	Protein Purification Using Accell™ Ion Exchange Media	M. Tomany
3	Purification of Prostatic Acid Phosphatase on Accell™ Ion Exchange Media	J. Gemski
4	Purification of Monoclonal Antibodies on Accell™ Ion Exchange Media	P. Strickler
5	Protein Separations Using an Ultrastyrigel® Column Packed in Water	D. Raymond
6	Applications of Affinity Chromatography	M. Pluskall
7	Comparison of Reverse Phase Columns for the Separation of Tryptic Digests	D. Schreiber
8	Analysis of Taka-Amylase A Oriented Peptides by M600 Reverse Phase Chromatography	Y. Takahashi
<u>Section 2 - Proteins: Membrane and Ultrafiltration Techniques</u>		
9	Chromatographic and Analytical Application for Activated Membranes	L. Blackstein
10	High Performance Ultrafiltration for Protein Separations	T. DiLeo
<u>Section 3 - Amino Acid Analysis</u>		
11	Advances in Pico•Tag® AAA Matrix Effects	S. Cohen
12	Applications of Pico•Tag® AAA in Food and Bev. Mkt.	M. Simpson
13	Physiological Amino Acid Analysis	A. Newhart
14	Improved Analysis of PTH Amino Acids Using the M490 Programable Multiwavelength Detector	T. Tarvin
15	High Sensitivity Analysis of PTH AA Using the 490 Det.	R. Mazzaresse
16	1) Amino Acids Analyzer Built with Waters HPLC Modules 2) Neopterin/Creatinine Determination	R. Barbes
17	Pico•Tag® Amino Acid Analysis	T. Wheat
18	Pico•Tag® Amino Acid Acid Analysis of Hydrolyzed Synthetic Peptides Containing Extraordinary n-Alkylated Secondary Amino Acids	H. Richardson
19	Pico•Tag® Analysis of Feeds and Foods	B. Frost
<u>Section 4 - GPC Applications</u>		
20	The Use of GPC in Photolithography	B. Dark
21	Characterization of Polymers and Additives Using the Model 410 RI and Model 490 Absorbance Detector	J. Del Rios
<u>Section 5 - Computer Applications</u>		
22	Appl. of Mixture Design Software for LC Methods Devel.	V. Warren

Section 6 - Ion Chromatography Applications

- | | | |
|----|--|----------------|
| 23 | Recent Advances in the UV Visualization of Anions | C. Santasania |
| 24 | New Eluents for Ion Chromatography | G. Harrison |
| 25 | Anion Anal. in Waste Water in the Mfg. of TNT by Ion LC | G. Bello |
| 26 | Phosphonates by Direct Injection and by Trace Enrichment | D. Wong |
| 27 | Opt. of Amperometric Det. Methods for Inorganic Anions | P. Jandik |
| 28 | Trace Enrichment of Polyvalent Cations | D. Cox |
| 29 | Applications of Ion Chromatography | R. Haas |
| | 1) Determination of Fluoride in Saliva | |
| | 2) Determination of Fluoride in HCl | |
| | 3) Determination of Sulphate in Cesium and Sodium Iodide | |
| 30 | Application of the ILC-1 in Australia | J. Kibby |
| 31 | Anion Analysis in Skin Tanning Industry Waste | A. Scandroglio |
| 32 | Analysis of Metal Ion by Ion Chromatography | C. Stacey |
| 33 | Analysis of Anions in Soil by Ion Liquid Chromatography | C. Van Tonder |
| 34 | Anions in Plant Extracts | A. Diez-Cascon |
| 35 | HPLC of Org. Acids Using Sulfonated Ultrastaygel® Col. | Y. Haroon |
| 36 | Separation of Short Chain Organic Acids | B. Jones |

Section 7 - Food and Pharmaceutical Applications

- | | | |
|----|--|----------------|
| 37 | Opt. of Grape Defect Anal. Using the Fast Fruit Juice Col. | C. Dorschel |
| 38 | Separation of Sugars by Reverse Phase HPLC | R. Day |
| 39 | Fast Carbohydrate Analyses with SAM | C. Phoebe |
| | Reagents and Experimental 4 Micron Spherical | |
| | Silica Radial-Pak Cartridges | |
| 40 | Valve Switching Technique as Applied to | P. Beals |
| | Food and Beverage Analysis | |
| 41 | HPLC Analysis of Aflatoxins | J. Oberholtzer |
| 42 | HPLC Methods for the Analysis of Mono- Di- | D. Friday |
| | and Triethanolamines | |
| 43 | The Analysis of Tricyclic Antidepressants in | M. Santini |
| | Cancer-Treated Patients | |
| 44 | Synthesis and Separation of Leukotrienes by | E. Aig |
| | Using the PrepLC 500 on Silica Columns, | |
| | A Bench Chemist's Point of View, | |
| | Getting The Job Done | |
| 45 | Use of the Waters 490 Detector in | J. Li |
| | Prostaglandin Separations | |
| 46 | Analysis of Eicosanoids by HPLC | G. Vella |
| 47 | The Use of the 410 RI Detector in the | D. Cotter |
| | Analysis of Starches | |

Section 8 - Sample Preparation

- | | | |
|----|---|---------------|
| 48 | Sep-Pak® Bibliography of Applications | P. McDonald |
| 49 | Sep Pak Considerations in Ion Chromatography | M. Woodman |
| 50 | Sample Preparation for the Analysis of Anions | B. Kahler |
| | in Soil by Ion Chromatography | |
| 51 | 1) Automated Sample Prep for Catecholamines | A. Elbasyouny |
| | 2) GABA in Urine | |

Section 9 - Preparative and Process Chromatography

- | | | |
|----|---|--------------|
| 52 | Preparative GPC | J. Ekmanis |
| 53 | Scale-UP and Preparative Separations of | R. Brooks |
| | Peptides on the Delta Prep 3000 | |
| 54 | Process HPLC Scale-Up Techniques and | T. Kierstead |
| | Process Economic Prediction | |

Section 10 - Applications Support

- | | | |
|----|---|---------------|
| 55 | Application Opportunities in Eastern Europe | J. Rutherford |
| 56 | Application Opportunities in Switzerland | F. Sabini |

Section 11 - Summaries of Daily Discussion Sessions
