Bibliography of Waters™ Technical Articles Now Available

The Applications Development Group has compiled a "Bibliography of Technical Articles Published by Waters Employees" which lists in chronological order technical articles published by Waters from 1968 to the present. It is divided into three sections -- Scientific Journals, Trade Magazines, and Chapters in Books or Monographs. An excerpt from the bibliography is shown below:

A. Scientific Journals

<u>DATE</u>	<u>JOURNAL</u>	<u>AUTHORS</u>	<u>TITLE</u>
1986	J. Chromatogr. Sci 24, 495-498	W. A. Dark	UV and Differential Refractive Index Detectors in Liquid Chromatography: The Workhorse Detectors
1986	J. Chromatogr. 336, 225-233	W. R. Jones A. L. Heckenberg P. Jandik	Integrated Separation Schemes in Chromatography. Simultaneous Employment of Ion Exclusion and Ion Exchange for the Separation of Borate, Chloride, Nitrate and Iodide.

A Waters sales representative pointed out recently that over the years, he had found journal articles written by Waters people to be very useful in establishing Waters technical leadership in the minds of his customers.

If you feel similarly and would like a copy of the bibliography, please contact Carolyn Galgano in Milford at Mailstop DL, extension 2366. Copies of the journal and trade magazine articles can be obtained from Carla Clayton (extension 3087) or Grace Lavallee (2743) in the Waters Technical Library.
